WHO ARE WE?

ADIC's volunteers are motivated PhD-students, engineers, Master students and Post-Docs from Institut Curie

Association of PhD students and young researchers of the Institut Curie

WHO ARE WE?

WHAT DO WE DO?

HOW TO JOIN US?

Association of PhD students
and young researchers of
the Institut Curie

OUR GOALS

REPRESENT

young scientists of the
Institut Curie

SUPPORT

the transition and
integration into your
professional career

IMPROVE

the working
environment of PhD
students

STRENGTHEN

the participation of
young researchers in
their scientific life

YOUNG SCIENTISTS RETREAT

Together with another European research institution, the ADIC organizes every year a joint young scientists retreat. Supported by the Training Unit, the purpose of this retreat, is to get together in a relaxed environment to discuss science, participate in career workshops and build your network with other young scientists.

RESIPI AND RATATOUILLE SEMINARS

ReSiPi (Research-Science & Pizza) and Ratatouille seminars aim to provide a platform for young researchers willing to present their work in an informal manner. Pizzas are provided for lunch.

ReSiPi seminars take place in Orsay and Ratatouille in Paris.

YOUNG RESEARCHERS IN LIFE SCIENCES (YRLS)

As a member of the YRLS Federation, the ADIC helps every year to organize the year to organize the YRLS conferences. This congress aims to provide young researchers with a favorable scientific environment for discussion and presentation and allows them to build a network.

PETIT-DEJEUNER PROFESSIONNELS

The aim of those meetings is to make young researchers meet with people who obtained their PhD in academia, working in industry, governmental agencies or in academia, but not as a researcher. These meetings take place every two months and the location changes every time.

WHAT DO WE DO?

APEROS AND PARTIES

Several Aperos and Parties are organized throughout the year. They take place at "Chez Marie" on the Paris site and are a great opportunity to meet colleagues from Paris, Orsay and Saint-Cloud.

FRENCH CLASSES

Together with the Training Unit, the ADIC organizes every year French language courses for every collaborator of Institut Curie willing to learn French or improve their French level.

HAPPY FRIDAY

Happy Fridays take place every second Friday from 6 to 8 pm. This event allows you to meet and discuss with colleagues at the end of the week or even between two experiments.

FORUM BIOTECHNO

The Forum BIOTechno takes place once a year in different cities and aims at encouraging interactions between young researchers and the different actors of the biotechnology field and related fields. This event helps young researchers with their career development through discussions about innovation, technology transfer, consulting, and management.
